Just Energy Group Inc.

Just Energy's business primarily involves the sale of natural gas and/or electricity to residential and commercial customers under long-term fixed-price, price-protected or variable-priced contracts and green energy products. By fixing the price of natural gas or electricity under its fixed-price or price-protected program contracts for a period of up to five years, Just Energy's customers offset their exposure to changes in the price of these essential commodities. Just Energy, which commenced business in 1997, derives its margin or gross profit from the difference between the fixed price at which it is able to sell the commodities to its customers and the fixed price at which it purchases the associated volumes from its suppliers. Just Energy also offers "green" products through its JustGreen program. The electricity JustGreen product offers the customer the option of having all or a portion of his or her electricity sourced from renewable green sources such as wind, run of the river hydro or biomass. The gas JustGreen product offers carbon offset credits which will allow the customer to reduce or eliminate the carbon footprint of their home or business. Management believes that the JustGreen products will not only add to profits, but also increase sales receptivity and improve renewal rates.

In addition, through National Home Services, Just Energy sells and rents high efficiency and tankless water heaters, air conditioners and furnaces to Ontario residents. Through its subsidiary Terra Grain Fuels, Just Energy produces and sells wheat-based ethanol.
