Green Star Energy Introduces New Unlimited Tariff for UK Households

The only one of its kind on the market, new tariff eliminates energy bill shock

Milton Keynes, UK/Toronto, Canada, October 5, 2015: Green Star Energy, a division of [Just Energy Group Inc.](#), is pleased to announce the launch of the Unlimited Tariff, a unique product for residential customers that removes the uncertainty associated with typical energy tariffs. With the Unlimited Tariff, customers gain the ability to fix their home gas and electricity bills, whatever the weather, for a full year.

“We’ve seen in recent years some customers moving to fixed priced tariffs. Although these can offer price certainty, they lack protection against a cold winter that can leave customers with surprisingly high bills” says Joanne Thornton, VP and General Manager at Green Star Energy. “Our Unlimited Tariff offers customers a fresh new option to fix their home energy bill regardless of harsh weather conditions that typically drive up usage, and subsequent price shock. We’ve removed that concern for consumers, giving them the ability to better budget one of their most important household costs.”

The company’s customer-centric focus means a commitment to deliver clear and simple home energy tariffs and surpass customer expectations with low prices, and expert customer service. Customers can take comfort knowing they have chosen an energy supplier with the experience, attention to service and expertise to deliver straight-forward programs and reliable, responsive customer care.

With Green Star, customers gain the convenience of purchasing their gas or electricity supply directly online. Those wishing to take advantage of the Unlimited Tariff can simply visit the Green Star Energy Quote and Switch portal on www.mygreenstarenergy.com or call 0800 011 4173.

About Green Star Energy:

Launched in 2013, Green Star Energy supplies electricity, gas and renewable energy at competitive prices. We provide a fresh approach to home energy with four simple tariffs to suit customer needs. Green Star Energy is the residential trading name of Hudson Energy Supply UK, a commercial energy supplier to UK business. Both Green Star Energy and Hudson Energy Supply UK are subsidiaries [of Just](#)

[Energy Group Inc.](#), a publicly traded company (NYSE:JE and TSX:JE) serving almost 2 million customers across North America and the UK. Visit www.mygreenstarenergy.com to learn more.
